The Journals of Captain James Cook (The Voyage of Endeavour 1768-1771) (Hardcover) (Chinese Edition) James Cook

This book describes the sailing event of Captain Cook exploring New Zealand and Australia. It was Captain Cook himself that daily recorded the unprecedented great voyage of Endeavour conducted by him. This voyage was an exploratory activity to the South Pacific (then known as South sea) which Cook made in the name of scientific investigation, following the order of the British Queen. In the expedition, Captain Cook surrounded the Northern and Southern Islands of New Zealand and discovered Australia. He landed Botany Bay in Sydney and then headed northward along the coast. Before leaving the continent of Australia, he announced Australia (then called new Holland, Cook renamed it New South Wales) belonged to the British Empire. Cooks discovery made the world map expand nearly 800 million square kilometers of land. Together Christopher Columbus, Cook has made important contributions for geographical discovery.
