What makes the *Unable to Die* series stand out?

It's a number of things, really. When I set out to write these books, I wanted to create a compelling mix of the sort of books I like to read. I ended up with something you might call a cyberpunk adventure set in an increasingly dystopian society. I had a lot of fun writing it, and so far readers seem to be having just as much fun reading it.

I'm particularly proud of the book's real-world relatability. A lot of us have known an elderly person who feels ready to pass on. Past a certain age, some would even call that impulse natural. Having my 91-year-old character discover he's immortal made for an entertaining twist on the reluctant hero figure.

How far into the future does the story go?

I don't want to spoil anything, but the series format allowed me to carry the premise a lot further than a standalone story typically would. A lot of things develop in unexpected ways, from the character level all the way up to the fate of the world. It gets pretty epic.

The *Unable to Die* series is a riveting chronicle of the future that will keep you guessing. There are times this series will have you wondering whether you're reading utopian science fiction instead of a dystopian world story. But it all becomes clear by the end.

Why should readers give the *Unable to Die* series a try?

Because it's a gripping tale of a possible future. Anyone interested in artificial intelligence, environmental catastrophe, economic precariousness, and immortality is in for a treat. I've been hearing from readers that they've read the entire series in a single day.

Thank you for reading!
