Covers the theory, instrumentation, and specific uses and applications of capillary electrochromatography (CEC) and pressurized flow capillary electrochromatography (PEC). Discusses advantages and limitations of CEC/PEC compared with more conventional modes of separation and explains method development and optimization.

Introducing the fundamentals and literature to those first approaching applications in CEC/PEC, the book will serve as a valuable guide for analytical chemists and biochemists, molecular biologists, immunologists, pharmaceutical scientists, and environmental and industrial chemists.
