Self-Organization in Complex Ecosystems. (MPB-42) (Monographs in Population Biology) Ricard V. Solé, Jordi Bascompte

Can physics be an appropriate framework for the understanding of ecological science? Most ecologists would probably agree that there is little relation between the complexity of natural ecosystems and the simplicity of any example derived from Newtonian physics. Though ecologists have long been interested in concepts originally developed by statistical physicists and later applied to explain everything from why stock markets crash to why rivers develop particular branching patterns, applying such concepts to ecosystems has remained a challenge.

Self-Organization in Complex Ecosystems is the first book to clearly synthesize what we have learned about the usefulness of tools from statistical physics in ecology. Ricard Solé and Jordi Bascompte provide a comprehensive introduction to complex systems theory, and ask: do universal laws shape the structure of ecosystems, at least at some scales? They offer the most compelling array of theoretical evidence to date of the potential of nonlinear ecological interactions to generate nonrandom, self-organized patterns at all levels.

Tackling classic ecological questions--from population dynamics to biodiversity to macroevolution--the book's novel presentation of theories and data shows the power of statistical physics and complexity in ecology. *Self-Organization in Complex Ecosystems* will be a staple resource for years to come for ecologists interested in complex systems theory as well as mathematicians and physicists interested in ecology.

From reader reviews:

Dennis Boone:

The book Self-Organization in Complex Ecosystems. (MPB-42) (Monographs in Population Biology) can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the good thing like a book Self-Organization in Complex Ecosystems. (MPB-42) (Monographs in Population Biology)? Wide variety you have a different opinion about publication. But one aim that will book can give many data for us. It is absolutely suitable. Right now, try to closer together with your book. Knowledge or data that you take for that, you could give for each other; it is possible to share all of these. Book Self-Organization in Complex Ecosystems. (MPB-42) (Monographs in Population Biology) has simple shape however, you know: it has great and large function for you. You can look the enormous world by open up and read a e-book. So it is very wonderful.

Hazel Freese:

Beside this particular Self-Organization in Complex Ecosystems. (MPB-42) (Monographs in Population Biology) in your phone, it could give you a way to get closer to the new knowledge or facts. The information and the knowledge you may got here is fresh from the oven so don't be worry if you feel like an outdated people live in narrow town. It is good thing to have Self-Organization in Complex Ecosystems. (MPB-42) (Monographs in Population Biology) because this book offers for your requirements readable information. Do you oftentimes have book but you seldom get what it's about. Oh come on, that will not end up to happen if you have this within your hand. The Enjoyable agreement here cannot be questionable, including treasuring beautiful island. So do you still want to miss the item? Find this book in addition to read it from currently!

Tracy Laflamme:

This Self-Organization in Complex Ecosystems. (MPB-42) (Monographs in Population Biology) is fresh way for you who has attention to look for some information as it relief your hunger info. Getting deeper you into it getting knowledge more you know or else you who still having tiny amount of digest in reading this Self-Organization in Complex Ecosystems. (MPB-42) (Monographs in Population Biology) can be the light food to suit your needs because the information inside this book is easy to get by simply anyone. These books build itself in the form that is reachable by anyone, sure I mean in the e-book type. People who think that in guide form make them feel sleepy even dizzy this publication is the answer. So there is absolutely no in reading a e-book especially this one. You can find what you are looking for. It should be here for you actually. So , don't miss the idea! Just read this e-book type for your better life and knowledge.

Donna Davis:

As a college student exactly feel bored to help reading. If their teacher inquired them to go to the library as well as to make summary for some guide, they are complained. Just very little students that has reading's

soul or real their leisure activity. They just do what the educator want, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that examining is not important, boring as well as can't see colorful pictures on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this Self-Organization in Complex Ecosystems. (MPB-42) (Monographs in Population Biology) can make you sense more interested to read.
