The Quantum Cop Lesley L. Smith

A physicist discovers how to control reality and all hell breaks loose. When physics professor Madison Martin is smashed by a car, her quantum expertise and survival instinct enable her to rewrite reality and save her life. She's freaked about what happened but, luckily, the hot physicist from the office next door volunteers to help her decipher what the hell just happened. As their chemistry sizzles she's ready for some experiments of a more biological nature. Unbeknownst to Madison her smartest student witnesses the bizarro accident and learns how to control reality, too. He and his buddies go on a quantum crime spree starting with never-ending beer, sorority girls losing their shirts, and progressing to bank robbery and worse. Everything seems lost when the nature of reality is endangered as fundamental forces like electromagnetism and gravity start changing. Can Madison overcome the odds, thwart her evil student and save reality itself?
