Transport Studies of the Electrical, Magnetic and Thermoelectric properties of Topological Insulator Thin Films (Springer Theses) Jinsong Zhang

This book presents the transport studies of topological insulator thin films grown by molecular beam epitaxy. Through band structure engineering, the ideal topological insulators, $(\text{Bi}_{1-x}\text{Sb}_x)_2\text{Te}_3$ ternary alloys, are successfully fabricated, which possess truly insulating bulk and tunable conducting surface states. Further transport measurements on these ternary alloys reveal a disentanglement between the magnetoelectric and thermoelectric properties. In magnetically doped topological insulators, the fascinating quantum anomalous Hall effect was experimentally observed for the first time. Moreover, the topology-driven magnetic quantum phase transition was Systematically controlled by varying the strength of the spin-orbital coupling. Readers will not only benefit from the description of the technique of transport measurements, but will also be inspired by the understanding of topological insulators.

From reader reviews:

Nicole Garner:

The book Transport Studies of the Electrical, Magnetic and Thermoelectric properties of Topological Insulator Thin Films (Springer Theses) give you a sense of feeling enjoy for your spare time. You can use to make your capable considerably more increase. Book can for being your best friend when you getting stress or having big problem with the subject. If you can make looking at a book Transport Studies of the Electrical, Magnetic and Thermoelectric properties of Topological Insulator Thin Films (Springer Theses) to become your habit, you can get much more advantages, like add your capable, increase your knowledge about several or all subjects. You are able to know everything if you like start and read a reserve Transport Studies of the Electrical, Magnetic and Thermoelectric properties of Topological Insulator Thin Films (Springer Theses). Kinds of book are a lot of. It means that, science guide or encyclopedia or other people. So , how do you think about this reserve?

Angela Smith:

As people who live in the actual modest era should be change about what going on or details even knowledge to make these people keep up with the era which is always change and move forward. Some of you maybe can update themselves by examining books. It is a good choice for you but the problems coming to you is you don't know which you should start with. This Transport Studies of the Electrical, Magnetic and Thermoelectric properties of Topological Insulator Thin Films (Springer Theses) is our recommendation to help you keep up with the world. Why, because this book serves what you want and need in this era.

Janice Delarosa:

Information is provisions for people to get better life, information currently can get by anyone in everywhere. The information can be a understanding or any news even an issue. What people must be consider while those information which is inside former life are challenging to be find than now is taking seriously which one is suitable to believe or which one the resource are convinced. If you find the unstable resource then you get it as your main information it will have huge disadvantage for you. All those possibilities will not happen with you if you take Transport Studies of the Electrical, Magnetic and Thermoelectric properties of Topological Insulator Thin Films (Springer Theses) as the daily resource information.

Edna Dixon:

Hey guys, do you wishes to finds a new book to see? May be the book with the headline Transport Studies of the Electrical, Magnetic and Thermoelectric properties of Topological Insulator Thin Films (Springer Theses) suitable to you? Often the book was written by popular writer in this era. Typically the book untitled Transport Studies of the Electrical, Magnetic and Thermoelectric properties of Topological Insulator Thin Films (Springer Theses)is the main of several books in which everyone read now. This book was inspired

many men and women in the world. When you read this e-book you will enter the new dimensions that you ever know before. The author explained their idea in the simple way, thus all of people can easily to comprehend the core of this publication. This book will give you a large amount of information about this world now. So that you can see the represented of the world with this book.
