## Irish Steam NOCK O.S.

This is a companion volume to the author's earlier quartet on the steam locomotives of the Southern, LNE, LMS and Great Western railways. Like them it deals mainly with the period between the two world wars, in the years of which period the author was a frequent visitor to Ireland. In covering the broad gauge lines, and many of the narrow gauge railways, it dips back into history many years before the nominal starting date of 1920. One of the most fascinating features of the Irish locomotive story is the remarkable longevity of the majority of the individual engines in use in the 1930s, and the fact that most of them continued to render reliable service until the 1950s is a tribute to the excellence of their basic design and construction, and to the way in which they were maintained and modernised from time to time. Mr Nock writes from extensive travelling experience, including many hundreds of miles on the footplate, and from friendship with some of the leading Irish railway personalities of the day, and with railway enthusiasts who have devoted the most sustained, erudite and scholarly interests to Irish affairs.
