SAS and R: Data Management, Statistical Analysis, and Graphics Ken Kleinman, Nicholas J Horton

An All-in-One Resource for Using SAS and R to Carry out Common Tasks

Provides a path between languages that is easier than reading complete documentation
SAS and R: Data Management, Statistical Analysis, and Graphics presents an easy way to learn how to perform an analytical task in both SAS and R, without having to navigate through the extensive, idiosyncratic, and sometimes unwieldy software documentation. The book covers many common tasks, such as data management, descriptive summaries, inferential procedures, regression analysis, and the creation of graphics, along with more complex applications.

Takes an innovative, easy-to-understand, dictionary-like approach
Through the extensive indexing, cross-referencing, and worked examples in this text, users can directly find and implement the material they need. The book enables easier mobility between the two systems: SAS users can look up tasks in the SAS index and then find the associated R code while R users can benefit from the R index in a similar manner. Demonstrating the code in action and facilitating exploration, the authors present extensive example analyses that employ a single data set from the HELP study. They offer the data sets and code for download on the book's website.

From reader reviews:

Kimberly Hopkins:

Information is provisions for folks to get better life, information these days can get by anyone at everywhere. The information can be a know-how or any news even an issue. What people must be consider whenever those information which is in the former life are challenging be find than now is taking seriously which one is acceptable to believe or which one typically the resource are convinced. If you receive the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All those possibilities will not happen within you if you take SAS and R: Data Management, Statistical Analysis, and Graphics as your daily resource information.

Michael Griffin:

Are you kind of busy person, only have 10 as well as 15 minute in your day to upgrading your mind ability or thinking skill perhaps analytical thinking? Then you are having problem with the book than can satisfy your short time to read it because all this time you only find publication that need more time to be examine. SAS and R: Data Management, Statistical Analysis, and Graphics can be your answer mainly because it can be read by an individual who have those short spare time problems.

Sondra Spencer:

A lot of publication has printed but it is unique. You can get it by online on social media. You can choose the best book for you, science, amusing, novel, or whatever through searching from it. It is called of book SAS and R: Data Management, Statistical Analysis, and Graphics. You can add your knowledge by it. Without departing the printed book, it could add your knowledge and make anyone happier to read. It is most critical that, you must aware about e-book. It can bring you from one destination to other place.

Patricia Baker:

Some people said that they feel bored when they reading a book. They are directly felt it when they get a half areas of the book. You can choose the particular book SAS and R: Data Management, Statistical Analysis, and Graphics to make your own reading is interesting. Your current skill of reading talent is developing when you just like reading. Try to choose simple book to make you enjoy to study it and mingle the opinion about book and reading through especially. It is to be 1st opinion for you to like to open a book and read it. Beside that the book SAS and R: Data Management, Statistical Analysis, and Graphics can to be your brand new friend when you're feel alone and confuse in what must you're doing of these time.
