Statistical Methods for Ranking Data (Frontiers in Probability and the Statistical Sciences) Mayer Alvo, Philip L.H. Yu

This book introduces advanced undergraduate, graduate students and practitioners to statistical methods for ranking data. An important aspect of nonparametric statistics is oriented towards the use of ranking data. Rank correlation is defined through the notion of distance functions and the notion of compatibility is introduced to deal with incomplete data. Ranking data are also modeled using a variety of modern tools such as CART, MCMC, EM algorithm and factor analysis.

This book deals with statistical methods used for analyzing such data and provides a novel and unifying approach for hypotheses testing. The techniques described in the book are illustrated with examples and the statistical software is provided on the authors' website.

From reader reviews:

Connie Sims:

What do you with regards to book? It is not important together with you? Or just adding material when you require something to explain what the ones you have problem? How about your spare time? Or are you busy person? If you don't have spare time to complete others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? All people has many questions above. They must answer that question because just their can do that will. It said that about book. Book is familiar on every person. Yes, it is correct. Because start from on guardería until university need this kind of Statistical Methods for Ranking Data (Frontiers in Probability and the Statistical Sciences) to read.

Corey Valenzuela:

The book untitled Statistical Methods for Ranking Data (Frontiers in Probability and the Statistical Sciences) contain a lot of information on this. The writer explains the girl idea with easy means. The language is very clear to see all the people, so do not worry, you can easy to read the idea. The book was compiled by famous author. The author will bring you in the new era of literary works. It is easy to read this book because you can read more your smart phone, or device, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can start their official web-site in addition to order it. Have a nice examine.

Robert Berman:

That publication can make you to feel relax. This kind of book Statistical Methods for Ranking Data (Frontiers in Probability and the Statistical Sciences) was vibrant and of course has pictures on there. As we know that book Statistical Methods for Ranking Data (Frontiers in Probability and the Statistical Sciences) has many kinds or variety. Start from kids until teenagers. For example Naruto or Private investigator Conan you can read and think you are the character on there. So , not at all of book are make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading which.

Donald White:

What is your hobby? Have you heard which question when you got students? We believe that that query was given by teacher to the students. Many kinds of hobby, All people has different hobby. And you also know that little person like reading or as studying become their hobby. You must know that reading is very important in addition to book as to be the thing. Book is important thing to add you knowledge, except your own teacher or lecturer. You find good news or update regarding something by book. A substantial number of sorts of books that can you go onto be your object. One of them is Statistical Methods for Ranking Data (Frontiers in Probability and the Statistical Sciences).
